Hi Gary,

Per our conversation yesterday afternoon, we are still waiting on the following:

Pesticides on one of the two samples

Mercury

Dioxin/Furans

Boiling point

Herbicides

As soon as I get any additional data, I will pass it along. Additionally, here is a statement from the lab regarding the BTU aliquot matrix:

"I checked the sample and talked to the analyst. Both the samples are waste water with few drops of oil floating and the analyst said he took most of the volume containing waste water."

Kristie:

What results are we waiting on for the tanks samples?

Gary Moore

Subject: CES Update 8/18/14

Gary,

Please see the attached documents. I have included the following:

- Updated tracking spreadsheet
- Complete analytical data for the ditch surface water sample (PDF and EDD; SDG number 52591)
- Complete analytical data for soil samples (PDF and EDD; SDG numbers 52720 and 52724)
- Partial preliminary data for the two tank samples (PDF only; SDG number 52863)

We will update the Scribe database using the attached EDDs and run updated summary tables.

Thanks,

Kristie
